## EXPERIENCE

<b>Engineering Intern</b> <i>Logitech – CTO Research Office</i>	Lausanne, Switzerland Sept. 2025 – Present
• Designing a novel distributed clock synchronization protocol for wireless multi-camera setups.	
• Optimizing for <b>real-time performance</b> and power efficiency, reducing latency and clock drift in <b>BLE networks</b> .	
• <b>Tech Stack:</b> C/C++, Linux, Zephyr, Firmware, Kernel Drivers, Embedded Systems, Distributed Systems.	
<b>Open-Source Contributor</b> <i>Google Summer of Code – Google DeepMind</i>	Remote Jun. 2025 – Aug. 2025
• Developed a comprehensive Gemini API Postman Workspace for <b>DeepMind</b> , including mocks and test scripts.	
• Built a <b>GitHub Actions</b> workflow to automate workspace updates, ensuring 100% synchronization with the API.	
• Streamlined integration for developers by creating robust environments for text, image, and code generation.	
• <b>Tech Stack:</b> JavaScript, Postman, Gemini API, GitHub Actions, CI/CD, REST API.	
<b>Software Dev Engineer Intern</b> <i>Amazon Web Services (AWS) – CloudWatch Alarms</i>	Dublin, Ireland Jul. 2024 – Jan. 2025
• Engineered a <b>new tool from scratch</b> solving the 'top-contributor' issue driving the highest volume of tickets.	
• Eliminated critical internal metric <b>ingestion delays</b> , directly achieving a <b>10% increase in alarm reliability</b> .	
• Owned the project end-to-end: authored technical designs, led reviews, and secured architectural approval from Principal Engineers.	
• <b>Tech Stack:</b> Java, Ruby, Python, AWS.	
<b>Open-Source Contributor &amp; DevOps Intern</b> <i>MLH Fellowship – G-Research</i>	Remote Jun. 2022 – Sept. 2022
• Selected as one of ~150 fellows from 30,000+ applicants (1% rate) to contribute to <b>G-Research Open Source</b> .	
• Engineered custom <b>GitHub Actions</b> , achieving a <b>3x speedup</b> and reducing resource consumption by <b>30%</b> .	
• Provisioned and managed self-hosted GitHub Runners on <b>GCP</b> using <b>Pulumi</b> .	
• <b>Tech Stack:</b> Java, TypeScript, Pulumi, AWS, GCP, Docker, Linux, CI/CD.	

## EDUCATION

<b>MSc in Computer Science</b> <i>École polytechnique fédérale de Lausanne (EPFL)</i>	Lausanne, Switzerland Sept. 2023 – Mar. 2026
• <b>Specialization:</b> AI & Data Science. GPA: <b>5.4/6</b> . Key Coursework: Distributed Systems, Backend Eng., NLP.	
• <b>Research (dlab):</b> Co-authored a <b>NeurIPS 2024 publication</b> on LLM personalities and a submitted <b>ICLR 2026 paper</b> on Prompt Compression. Supervised by Prof. Robert West.	
• <b>Thesis:</b> Collaboration with <b>Logitech (CTO Office)</b> and RS3Lab.	
<b>BSc in Computer Science and Engineering</b> <i>University of Bologna</i>	Cesena, Italy Sept. 2020 – Jul. 2023
• <b>Grade:</b> 110/110 <i>cum laude</i> . GPA: <b>29.5/30</b> . Awards: <b>Sergio Focardi Award</b> (Top student of the year).	
• <b>Thesis:</b> Engineered TDSFT (cancer segmentation fusion tool). Currently deployed in clinical practice, achieving a <b>36x speedup</b> (180 → 5 mins). Co-authored a <b>Frontiers in Bioengineering</b> publication.	

## PROJECTS

<b>Autonomous Drone Racing Team — Partnership with TII Abu Dhabi</b>
• Engineered an autonomous navigation stack for high-speed drones presented at the <b>ICRA 2022 DodgeDrone Challenge</b> .
• Optimized simulator efficiency and trained <b>Reinforcement Learning</b> models for obstacle avoidance.
• <b>Tech Stack:</b> C/C++, Python, ROS, AWS, Keras, TensorFlow, RL.

## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, JavaScript/TypeScript, Scala, Go, Ruby, SQL, HTML, CSS, Bash.  
**Technologies:** AWS, Docker, Kubernetes, Linux, Git, GitHub Actions, CI/CD, Postman, Node.js, React.
